LEADERS IN
INNOVATION

Atlas Copco

Atlas Copco AIRmonitor™ an After-market Revolution

Compressed air is a vital source of energy in various production processes. Its availability, quality and cost have a tremendous impact on your company's performance. When your compressed air installation is participating in Atlas Copco's AIRmonitor™ service you can be rest assured that you have a trusted partner watching over your investment.

AIRmonitor™

A service that connects your Atlas Copco compressed air installation to the local Atlas Copco after-market organisation over the internet.

Peace of mind through professional care

Through the use of our truly unique AIRmonitor™ system and the participation in one of Atlas Copco's varied Service plans you can be assured your compressed air system will be operating as efficiently as possible 24/7.

You rest comfortably knowing that Atlas Copco is there for you when you need us. The AIRmonitor™ system allows Atlas Copco's after-market organisation to monitor your compressed air system and react to problems before they cause you unnecessary and costly down time of your process.

Specific plans can be tailored to address your plant's needs from simple monitoring and preventive maintenance services to complete system responsibility for maintenance of your entire compressed air system by highly trained Atlas Copco service technicians.

By leveraging the technology behind our Elektronikon® regulator and the internet Atlas Copco can warn you and take preventative action before trouble starts. The preemptive attention afforded by the **AIRmonitor™** system will increase the overall efficiency of your compressed air system, increase the expected lifetime of the Atlas Copco equipment and most importantly save you money.

Virtual Maintenance Benefits

- remote monitoring 24 hours per day, seven days per week
- the installation can be accessed by users that you give access to
- all measured installation data can be accessed for review
- automatic notification of warnings or shutdowns via e-mail or SMS
- quick summary of installation status contained in the e-mail for fast diagnosis of the system
- diagnosis of most problems can be handled remotely, eliminating unnecessary visits by service technicians
- maintenance of the installation can be scheduled more efficiently
- minimises downtime, allows for more efficient service activity, notifies you before trouble occurs and saves you money
- periodic reports can be generated to discuss the history and potential improvements of an installation

Atlas Copco AIRmonitor™

Efficient, Reliable, Flexible...

Proper maintenance of compressed air equipment has a direct impact on reliability and operating costs of the entire system. A properly serviced compressed air installation is one way to avoid the risk of an interruption in your production process by an unscheduled interruption in your plant's compressed air supply. AIRmonitor™ services in addition to Atlas Copco's varied portfolio of Service plans are an excellent way to ensure that your compressed air installation is always operating at its most efficient point.

AIRmonitor™ monitoring

Comprehensive and simple views of compressor operating status and history can be reviewed. Locally via your in-house local area network, LAN, or via a modem telephone link.

What can be incorporated into AIRmonitor™

- any generation of Elektronikon® regulated compressor
- compressed air treatment equipment within the installation
- any generation of electro-pneumatic regulated compressor, even most competitor machines

What you need to install AIRmonitor™

- an analog telephone line and modem
- a subscription with an internet service provider, ISP
- a subscription with your local Atlas Copco representative for the AIRmonitor™ service

The face of innovation

What sets Atlas Copco apart as a company is our conviction that we can only excel in what we do, if we provide the best possible know-how and technology to really help our customers produce, grow and succeed.

There is a unique way of achieving that - we simply call it the Atlas Copco way. It builds on **interaction**, on long-term relationships and involvement in the customers' process, needs and objectives. It means having the flexibility to adapt to the diverse demands of the people we cater for.

It's the **commitment** to our customers' business that drives our effort towards increasing their productivity through better solutions. It starts with fully supporting existing products and continuously doing things better, but it goes much further, creating advances in technology through **innovation**. Not for the sake of technology, but for the sake of our customer's bottom line and peace-of-mind.

That is how Atlas Copco will strive to remain the first choice, to succeed in attracting new business and to maintain our position as the industry leader.
